 **versamill** magicxlc

extended-life cutting and grinding fluid

For all Versamill wet-milling dental machining centers

### magicxlc

magic xlc is a high-performance, synthetic fluid for working glass-ceramics, steel, plastics and other dental materials NOT including zirconium. magic xlc contains little to no oil, is typically hard-water tolerant with good corrosion protection, and leaves very low residue for easy cleaning.

**Signal Word:** None

**Hazard Statement:**

This mixture does not meet the criteria for classification.

**Leak & Spill Procedures:**

Eliminate all ignition sources.  
Pump large spills into recovery containers.  
Absorb small spills with absorbant materials.  
Contain spill at source and prevent discharges to streams & sewers.

**Precautionary Statement:**

Observe good industrial hygiene practices.  
Wash hands after handling. Store away from incompatible materials. Dispose of contents/-container in accordance with local/region/national/international regulations.

***Read safety instructions, SDS, and emergency procedures before handling.***
